Performance in relation to the S&P

A ten-year correlation¹ of 0.141 for the benchmark vs the S&P 500 Total Return highlights the diversification provided by having Palladium as part of your portfolio.²

For illustrative purposes only.

¹ Correlation is the extent to which the values of two indices have historically moved in tandem with one another, measured on a scale of -1 to +1. Perfect positive correlation (+1) means that as one index increases or decreases, the other index moves lockstep in the same direction. A correlation of -1 means the two indices move in exactly inverse directions.

The abrdn Palladium ETF Trust is not an investment company registered under the Investment Company Act of 1940 or a commodity pool for purposes of the Commodity Exchange Act. Shares of the Trust are not subject to the same regulatory requirements as mutual funds. These investments are not suitable for all investors. Trusts focusing on a single commodity generally experience greater volatility.

Commodities generally are volatile and are not suitable for all investors. Please refer to the prospectus for complete information regarding all risks associated with the Trust.

The value of the Shares relates directly to the value of the precious metal held by the Trust and fluctuations in the price could materially adversely affect investment in the Shares. Several factors may affect the price of precious metals, including: A change in economic conditions, such as a recession, can adversely affect the price of the precious metal held by the Trust. Some metals are used in a wide range of industrial applications, and an economic downturn could have a negative impact on its demand and, consequently, its price and the price of the Shares; Investors' expectations with respect to the rate of inflation; currency exchange rates; interest rates; Investment and trading activities of hedge funds and commodity funds; and global or regional political, economic or financial events and situations. Should there be an increase in the level of hedge activity of the precious metal held by the Trust or producing companies, it could cause a decline in world precious metal prices, adversely affecting the price of the shares. Should there be an increase in the level of hedge activity of the precious metal held by the Trust or producing companies, it could cause a decline in world precious metal prices, adversely affecting the price of the shares.

Also, should the speculative community take a negative view towards the precious metal held by the Trust, it could cause a decline in prices, negatively impacting the price of the shares. There is a risk that part or all of the Trust's physical precious metal could be lost, damaged or stolen. Failure by the custodian or sub-Custodian to exercise due care in the safekeeping of the precious metal held by the Trust could result in a loss to the Trust.

The Trust will not insure its precious metals and shareholders cannot be assured that the custodian will maintain adequate insurance or any insurance with respect to the precious metals held by the custodian on behalf of the Trust. Consequently, a loss may be suffered with respect to the precious metal that is not covered by insurance. Commodities generally are volatile and are not suitable for all investors.

Diversification does not eliminate the risk of experiencing investment losses.

Investors buy and sell shares on a secondary market (i.e., not directly from Trusts). Only market makers or "authorized participants" may trade directly with the Trusts, typically in blocks of 12.5k to 50k shares.
