

ASSESSMENT REPORT

2023

abr dn

Generated 22-12-2023

About this report

PRI reporting is the largest global reporting project on responsible investment. It was developed with investors, for investors.

PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including an Assessment Report.

The Assessment Reports, which are produced using signatories' reported information, support signatories to have internal discussions about their practices. They facilitate learning and development by outlining how signatories' responsible investment practices compare year-on-year, across asset classes, and with peers at a local and global level. Signatories can also choose to make these available to clients, beneficiaries, and other stakeholders.

This Assessment Report is an export of the scores for all the assessed indicators and modules you responded to in the PRI Reporting Framework during the 2023 reporting period.

The high-level assessment methodology can be found under the Assessment Methodology section of the How investors are assessed on their reporting webpage. Question-level assessment criteria can be found after each core indicator in the Investor Reporting Framework webpage.

Assessment Reports are confidential and only accessible to the reporting signatories they belong to on the Data Portal.

[View](#) the dataset of median scores, based on all signatories' scores.

Publication Guidelines

As responsible investment practices have moved into the mainstream, PRI signatories are increasingly choosing to share their scores and Assessment Reports externally.

The PRI encourages such transparency and has developed a set of guidelines to support signatories wanting to disclose their assessment results, to ensure they are represented accurately and consistently:

- Signatories should avoid portraying any single score as representative of an overall or average score.
- Signatories should avoid disclosing individual module scores in isolation and instead present them with the full Summary Scorecard, which contains all module scores, to ensure full transparency.
- Signatories should avoid disclosing individual indicator scores in isolation and instead present them with the full Module Scorecard, which contains all individual indicator scores per module.
- Publication of scores should be accompanied by access to the full Assessment Report (once available) and public Transparency Report.

Assessment Reports are the intellectual property of PRI. Under no circumstances can this report or any of its contents be sold to third parties. Consent from the reporting signatory must be provided when sharing with third parties. Signatories should consider and be aware of any local regulations around sharing or promoting their PRI scores and/or third-party ratings.

Disclaimers

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2023 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.
