Bringing together a broad range of asset classes to achieve your investment outcome

Investors have an unprecedented range of asset classes to explore to help them reach their investment goals. For 30 years at abrdn, we've been bringing together our expertise across public, private, core and specialist asset classes to build multi-asset strategies.

By investing in a broad range of asset classes and investment strategies, we can manage your portfolio risk in an effort to generate returns and income that are aligned with your objectives over a market cycle. Whatever the outlook for mainstream equities and fixed income, our multi-asset approach will help you achieve your specific investment goals. An assessment of environmental, social and governance (ESG) factors is integrated into every stage of the investment process. We also manage specialist sustainable strategies, such as climate solutions.

Our investment culture is client-centred with a people ethos. Our focus is on delivering excellence with high integrity via continuous improvement.

Why abrdn for multi-asset

We draw on the full investment capabilities of abrdn to deliver multi-asset strategies to expand your sources of return and look to deliver smoother, long-term investment performance.

Broaden your potential

We have the scale and expertise to combine a range of specialist and mainstream asset classes. This expands the sources of potential return. Together with a forward-looking assessment of risk, this is designed to give you smoother, long-term investment performance.

Target your outcome

Many of our multi-asset strategies are designed to target specific goals and risk-reward requirements – from tactical asset allocation to diversified income/growth to absolute return 'cash-plus' strategies. These can be further customised to meet your needs.

Focus on sustainability

Our multi-asset strategies can help contribute to the long-term health of society and our planet. We assess ESG factors when we invest. We can incorporate climate scenarios into our forecasts for asset class returns. We also manage specialist sustainable strategies.

"Our integrated research platform and advanced risk management enable us to generate high-quality ideas and to deliver specific outcomes for our clients. This is underpinned by an inclusive investment culture that is focused on continuous improvement."
